

Atlas Requirements

Product Manager	Kieran Finger
Project Leads	Kieran Finger, Qise Salem, Alexander Ferguell
Technical Leads	Sakif Khan, Carson Hinsverk

Introduction

ATLAS is a self-hosted algorithmic trading platform for small quantitative trading teams. It provides a shared interface for deploying, managing, and monitoring live trading strategies, with supporting tooling for strategy development, backtesting, and observability.

ATLAS

NAV $2,847,392 | Daily P&L +$14,729 | Gross Exposure 68.4% | Net Exposure +12.3% | Active Strategies 7
